

Peer assessment form for KV7006 Group Assignment I

Instructions:

- This form should be completed collectively by the group and submitted as one document.
- Each member should provide their full name, student ID, signature and date.
- Peer assessment should be based on the five criteria below using a scale of 1 to 5 (1 = Poor, 5 = Excellent).
- Provide justifications in the comments section explaining the rationale behind the given scores.
- The total scores will be used to determine individual contributions to the group assignment.

Note: Ideally, every group member would contribute to this assignment equally and therefore receive the same group mark. However, the individual mark may be adjusted based on the peer assessment scores which reflect each member's contribution. The **individual contribution ratio** is used to adjust the group mark according to each member's relative contribution.

Section 1: Group details

Group number: 8	Report title: Machine Learning Approaches to Human Activity Recognition: A Literature Review
------------------------	---

Group members

Student's full name	Student ID	Signature	Date
Ridwan Oyetunde Hazeez	W25050586	RIDWAN.O.H	24/03/2026
Afeni Akinola David	W25027325	Akinola	24/03/26
Ebuka Ibe Madujibeya	W25051098	Ebuka	24/03/26
Afilaka Praise	W25052136	Praise	24/03/26
Jino John Kurian	W25035361	Jino	24 th -03-26
Sibtain Mehdi Razvi Syed	W25039720	Sibtain	24 th -03-26

Section 2: Equal contribution confirmation

Did all members contribute equally to the group assignment?

☒ **Yes:** All members contributed equally

☐ **No:** Contributions varied between members

If you selected “Yes”:

Please confirm the following statement:

I confirm that all group members contributed equally to the assignment in terms of effort, participation and task completion.

☒ **I confirm that all members contributed equally.**

(If this option is selected, you do NOT need to complete the rest of the form.)

Section 3: Peer assessment

Peer assessment criteria

	1 st member's name	2 nd member's name	3 rd member's name	4 th member's name	5 th member's name	6 th member's name
1. Knowledge and skills: Demonstrated understanding and application of relevant skills	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5
2. Engagement and commitment: Attended meetings, contributed to discussions, and actively participated in group activities.	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5
3. Task contribution: Completed assigned tasks on time and contributed to writing and research.	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5
4. Team collaboration: Respected others, supported group members, and worked to resolve conflicts constructively.	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5
5. Creativity and open-mindedness: Contributed new ideas, considered feedback, and integrated suggestions from others.	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5	1 / 2 / 3 / 4 / 5
Total score S_i (out of 25)	S_1	S_2	S_3	S_4	S_5	S_6
Individual contribution ratio	$\frac{S_1}{\max(S_1, S_2, \dots, S_6)}$	$\frac{S_2}{\max(S_1, S_2, \dots, S_6)}$	$\frac{S_3}{\max(S_1, S_2, \dots, S_6)}$	$\frac{S_4}{\max(S_1, S_2, \dots, S_6)}$	$\frac{S_5}{\max(S_1, S_2, \dots, S_6)}$	$\frac{S_6}{\max(S_1, S_2, \dots, S_6)}$

Comments: Provide justifications in the comments section explaining the rationale behind the given scores)

Group activity log: Include evidence of your group activities to support your collaboration efforts such as:

- Meeting records: document minutes and attendance, dates, times for every meeting. Note the agenda, decisions made and individual responsibilities assigned.
- Communication logs: include summaries or snapshots from group communication tools (e.g., Microsoft Teams or email threads) that capture discussions, brainstorming sessions and problem-solving exchanges.
- Progress reports: regular updates or check-ins that describe the status of the assignment and individual contributions.
- Collaborative work and shared documents: include version histories from platforms like Google Docs, Microsoft OneDrive or MS Teams that show edits, comments and contributions by each member.

Illustrative note on calculating individual contribution ratio:

The individual contribution ratio is used to adjust the group mark according to each member's contribution. Here is how it works:
Each member's ratio is calculated by dividing their total score (S_i) by the maximum score within the group ($S_{\max}$).

$$S_{\max} = \max(S_1, S_2, \dots, S_n) \text{ where } n \text{ represents the total number of members in a group}$$

For member i , their total score, S_i , is the sum of the scores received for the 5 assessment criteria: $S_i = \sum_{j=1}^5 s_{ij}$

Where s_{ij} is the score member i received for peer assessment criterion j . In other terms:

s_{i1} is the score member i received for criterion “**1. Knowledge and skills**”

s_{i2} is the score member i received for criterion “**2. Engagement and commitment**”

s_{i3} is the score member i received for criterion “**3. Task contribution**”

s_{i4} is the score member i received for criterion “**4. Team collaboration**”

s_{i5} is the score member i received for criterion “**5. Creativity and open-mindedness**”

The individual contribution ratio for member i is then calculated as follows: $Ri = \frac{S_i}{\max(S_1, S_2, S_3, S_4, S_5)}$

Finally, the individual assignment mark for member i is obtained by multiplying the group mark by their individual contribution ratio (Ri) which reflects each member's level of contribution:
 $\text{Individual_Mark} = Ri * \text{Group mark}$

If a member's contribution is equal to the highest contribution within the group (i.e. $Ri=1$), they will receive the full group mark. Otherwise (if their contribution is lower), their individual mark will be reduced proportionally according to their contribution ratio.

Example of how the individual contribution ratio is calculated:

	1 st member's name	2 nd member's name	3 rd member's name	4 th member's name	5 th member's name	6 th member's name
1. Knowledge and skills: Demonstrated understanding and application of relevant skills	5	4	5	5	4	5
2. Engagement and commitment: Attended meetings, contributed to discussions, and actively participated in group activities.	5	5	5	5	3	3
3. Task contribution: Completed assigned tasks on time and contributed to writing and research.	5	3	5	5	3	3
4. Team collaboration: Respected others, supported group members, and worked to resolve conflicts constructively.	5	4	5	5	4	4
5. Creativity and open-mindedness: Contributed new ideas, considered feedback, and integrated suggestions from others.	5	4	5	5	4	4
Total score S_i (out of 25)	25	20	25	25	18	19
Individual contribution weighting ratio	25/25=1.0	20/25=0.80	25/25=1.0	25/25=1.0	18/25=0.72	19/25=0.76
